YIWU HAUSLUX COMMODITY CO.,LTD

www.haus-lux.com

HAUS LUX is a leading company in the field of developing and manufacturing household cleaning tools. The company was established in 2022, and its founders have long experience in the sector of developing and manufacturing cleaning tools. The company offers a very wide and diverse range of high-quality cleaning tools to meet the different needs of customers.

Our vision

To be the preferred brand in the Middle East, Africa, Southeast Asia and South America that enjoys consumer trust and provides the widest and highest quality range of cleaning tools in the world.

Our goal

The company always seeks to meet the needs of customers and provide high-quality products, with a focus on innovation, development and quality. We look forward to building a leading name in the world of cleaning. We also look forward to dealing with the best and largest customers in the world who are looking for reliable and effective home cleaning products.

Our mission

Our mission is to provide high quality products that make cleaning easier and more efficient for everyone, innovation and sustainability are essential parts of our business strategy to achieve sustainable development. We are committed to quality and reliability in providing products that meet customer expectations and ensure their satisfaction.

Packing	1	PCS
QTY/CTN	8	PCS
CBM	0.24	CBM

Step 1: Pour water to the bucket full, ensure the water is above the central rod.

Step 2: assemble two buckets by using the clasp.

Step 3: Release the handle lock, place it into the bucket with water, and press down.

Step 4: Place the mop in the stainless steel basket, making a vertical motion with the handle. The faster the spin, the cleaner the mop head will be.

Step 5: lock the handle before clean.

Important: If the bushings become loose, they should be replaced as shown in the picture, with a slight pressure on the pin.

Flat Mop Cleaning Kit

ASSEMBLY INSTRUCTIONS
INSTRUCTIONS D'ASSEMBLAGE

1 Insert and twist clockwise to assemble the 4 pole pieces.

2 assemble the mop head and platform

3 pour water into tank

4 Insert the plate into wash tank. Slide up and down to soak/rinse the mop.

5 Insert the mop through the DRY chamber. Slide up and down to squeeze extra water out of microfiber pad by the built-in scraper blades

6 Disassemble the pole, then place it inside the bucket with the mop head for compact storage
